## **ELIMINATOR HD** Heavy Duty Actuator

## **ELIMINATOR HD** Heavy Duty Linear Actuator Features:

Standard configurations include parallel offset (1:1 or 2:1 gearbelt ratio) and in-line

Motor interface designed to accommodate a wide range of motor brands and sizes.

Rugged piston rod anti-rotation features a pair of opposing bronze keys guided within steel tracks

Re-Grease Provision

Twin dovetailed, full stroke, switch tracks simplify mounting and adjusting of Hall effect or Reed type position switches

Long sleeve bearing guides and supports the piston

Rod wiper seal protects the internal components from contamination

High capacity, precision ball screw and support bearing system for long life and smooth, quiet operation

High strength, heavy wall steel cylinder provides rigidity, stability, and protection from operating abuse

Internal bumper helps prevent jamming at both ends of travel

Heavy wall, alloy steel piston provides rigidity, and a hard chrome plated, ground, and polished surface resists corrosion and mechanical damage Internal threaded piston nose accepts standard rod ends; e.g. Spherical rod eye, misalignment coupler, etc.
